

Newsletter September 2009

Reminder: Population Forum – 13TH September

We are presenting a forum on the issue of population and climate change

Aim:

To have dialogue amongst those who attend and give people a chance to express their view and understand what others' views are as well. As a group we will try to understand all the arguments about population and climate change and see how those arguments are supported or disputed. We will try to reach, through this dialogue, a synthesis.

When :

2 - 4pm on 13th September.

Where:

Parramatta City Library, Darug Room on the first floor

Who:

The forum is open to anyone on our mailing list. **RSVP by 11th September**

Bill Tibben: 0404 210 438 or etibbos@optusnet.com.au

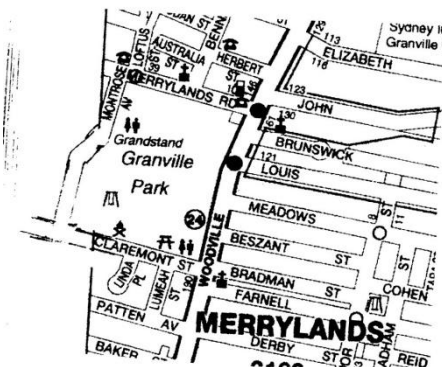

Annie Nielsen: 0425 265 169

Pre 350.ORG BBQ - 27th September

Come and join us on 27th September from 11am in Granville Park
– corner of Claremont and Montrose Streets

The whole world is moving towards 350.ORG Day on 24th October and Parracan is going to do several events (detail next page) and to get into the mood for the big day we are having a 'pre picnic'. Come along, bring a blanket and a plate. Meet the active members of Parracan and hear what we have been and what we will be doing ... **get involved!**

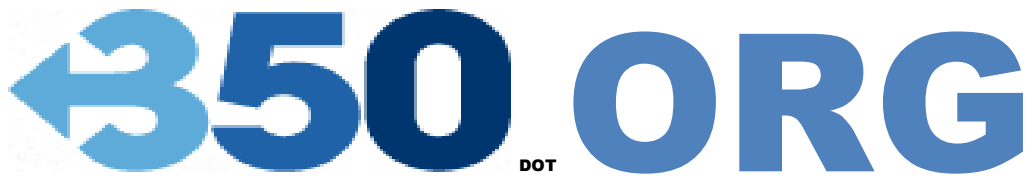

RSVP to Bill Tibben 0404 210 438 or mail@parracan.org by 17th September

Parramatta Climate Action Network

presents

24TH October – Parramatta Mall from 8.00am

A DAY OF SERIOUS FUN

- write or draw a message for our Government (we need 350)
- make one of the 350 tiles that will become part of a community sculpture
 - be in the photo of a giant human 350
 - have a go at washing coal to see if you can get it clean
 - want to know more about climate change?
 - come to our Forum

Program

- stalls open at 8am
- 1.00pm to 3.00pm bring in messages you have already made
- 3pm to 4.30 for the Forum (in the Charles Byrne Room, Parramatta Town Hall)

Rationale

350.org is an international event to be held on 24 Oct in local communities throughout the world.

WHY? To create awareness of global warming and a safe climate level. 350 parts per million is the highest safe level of CO₂ that the atmosphere can sustain to ensure our children can continue living comfortably in Australia. Currently the level of CO₂ is 390ppm...this is why... ***we need your help!!***
